

Monash Health Workplace Based Assessment program

This is a 6-month program of assessment. At the end of the program if you are successful, you will gain your AMC certificate allowing you to proceed to general registration and specialty training. Program Directors and your supervisor will also be informed. The essential elements of the assessments are as follows: All assessments are at end PGY1 level

Covers all disciplines :

- Children's Health
- Women's Health
- Mental Health
- Adult Health – Medicine
- Adult Health – Surgery
- Emergency Medicine

Summative assessments:

- Mini-CEX - 12 (must pass 9)
- Case Based discussions – 6 (must pass 5)
- Term assessments – 3 (all must be satisfactory)
- Multi-Source Feedback – 9 colleagues (at end of 6 months)
- Clinical Skills assessment – 6 (all must be satisfactory), Venepuncture (independent), IV cannulation (independent), Sterile gown and glove (independent), Male urethral catheterisation (independent), Suturing (supervised*), Plaster backslab application (supervised*)

Assessment process:

During the first month of the program each candidate is expected to do at least four formative (practise) assessments – 2 mini-CEX and 2 Case-based discussions. Once the candidate has completed their formative assessments, they will be provided with a Blueprint for the summative (real) assessments to start. The candidate will be advised by email of the assessment required, assessor name and contact details and date of completion of the assessment. When completing the summative assessments, the candidate will be required to take the appropriate form with them when meeting with an assessor.

Once the form has been completed and signed by both the assessor and the candidate, the candidate will then enter the assessment data onto survey monkey and will then upload the form via Monash Doctors Website. This will be covered in more detail when at the first meeting with the WBA administrator.

We encourage you to try and complete as many of the clinical skills assessments as soon as possible, preferably within your first month.

The following forms can be downloaded from the <https://monashdoctors.org/wba-assessment-forms/>

- Mini-CEX assessment forms
- Case-Based Discussion forms
- Term assessments
- Multi-Source Feedback form
- Skills assessment forms (DOPS)
